43. Briefly list and describe the two ways in which we collect information (4 points)

Directly through personal observation - people tend to think that obtaining firsthand information (what they observe themselves) is always the best way - unfortunately, most people are poor observers

Indirectly through secondary sources - Even more problematic - must rely on on the quality of someone else's observations. How did they obtain the information in the first place. What are their motives for providing the information? Do they have an agenda?

44. Briefly list and describe 2 of the 4 fundamental assumptions of science (4 points)

Two of the following:

There is a real universe which is knowable

The universe operates according to understandable rules

The universe's laws are immutable

The rules can be discerned, studied, and understood through a process of observation, research, and experimentation

45. Briefly define and describe Hyperdiffusion (3 points)

The notion that all major cultural innovations and societies derive from one (usually lost) ancient state, nation, civilization, etc.

46. Briefly list and describe 2 of the 3 themes found in the writings of Erich von Daniken (4 points)

2 of the following 3

Inkblot - All over the world there are prehistoric pictorial and three dimensional representations - drawings on cave walls, pottery, and sculptures - as well as early written accounts that can be most reasonably interpreted as the drawings, sculptures, or literary descriptions by primitive peoples of actual extraterrestrial visitors to earth.

Amorous Astronaut - The biological evolution of the human species cannot be understood unless we assume the involvement of a scientifically advanced extraterrestrial civilization.

Our Ancestors, the Idiots - Some ancient artifacts and inventions are far too advanced and complex to have resulted from simple, prehistoric human intelligence and ingenuity. These advanced artifacts and great inventions must instead be the direct result of purposeful introduction by extraterrestrial aliens.

47. Briefly list and describe 2 of the 3 motivations for the Piltdown man hoax. (4 points)

2 of the following 3

Nationalism - The Piltdown finds put England “on the map” in terms of human evolution and paleoanthropology

Scientific Ideology - Supported the “brain centered” paradigm that most scientists believed in

Fame - Discovery brought a great deal of notoriety to Dawson and Woodward

48. List and describe the 3 of the 5 arguments that were commonly used to prove that indigenous North Americans had not built the mounds found along the Mississippi river and its tributaries (9 points)

3 of the following 5:

First Nations peoples were too primitive to have built the mounds and produced the beautiful stone, metal, and ceramic artifacts attributed to the moundbuilders.

The mounds and associated artifacts were much more ancient than even the earliest remnants of First Nations culture

Stone tablets had been found in the mounds that bore supposed inscriptions in European, Asian, or African alphabets

First Nations peoples were not building mounds when first contacted by European explorers and settlers. When asked who made the mounds, they professed complete ignorance

Metal artifacts made of iron, silver, ore-derived copper, and various alloys had been found in the mounds
