

An underwater scene with ancient ruins and fish. The scene is dimly lit with a blue-green hue. In the background, there are large, classical-style buildings with columns and arches. In the foreground, there are smaller, more intricate structures, possibly part of a city or a temple. Several fish of various sizes are swimming around the ruins. The overall atmosphere is mysterious and ancient.

NORTHAMPTON, Mass. — A U.S.-led research team may have finally located the lost city of Atlantis, the legendary metropolis believed swamped by a tsunami thousands of years ago, in mud flats in southern Spain.

"This is the power of tsunamis," head researcher Richard Freund told Reuters.

"It is just so hard to understand that it can wipe out 60 miles inland, and that's pretty much what we're talking about," said Freund, a professor at the University of Hartford who led an international team searching for the true site of Atlantis.

To solve the age-old mystery, the team analyzed satellite imagery of a suspected submerged city just north of Cadiz, Spain. There, buried in the vast marshlands of the Dona Ana Park, they believe that they pinpointed the ancient, multiringed

THE PROFILE OF ATLANTIS,
 As revealed by the deep-sea soundings of H. M. ship "Challenger" and the U. S. ship "Thetis."

ATLANTIS:

THE ANTEDILUVIAN WORLD.

BY
 IGNATIUS DONNELLY.

ILLUSTRATED.

*The world has made such comet-like advance
 Lately on science, we may almost hope,
 Before we die of sheer decay, to learn
 Something about our infancy; when lived
 That great, original, broad-eyed, sunken race,
 Whose knowledge, like the sea-sustaining rocks,
 Hath formed the base of this world's fluctuous lore.*"

We are on the threshold. Scientific investigation is advancing in great strides. Who shall say that one hundred years from now the great museums of the world may not be adorned with gems, statues, arms, and implements from Atlantis, while the libraries of the world shall contain translations of its inscriptions, throwing new lights upon all past history of the human race, and all the great problems which now perplex the thinkers of our day.

★ Sclater proposed that
Madagascar and India had
once been part of a larger
continent

The anomalies of the Mammal fauna of Madagascar can best be explained by supposing that... a large continent occupied parts of the Atlantic and Indian Oceans... that this continent was broken up into islands, of which some have become amalgamated with... Africa, some... with what is now Asia; and that in Madagascar and the Mascarene Islands we have existing relics of this great continent, for which... I should propose the name Lemuria

SANTORINI (THERA)

A satellite-style topographic map of the island of Santorini (Thera) in Greece. The map shows the island's unique volcanic caldera, a large central depression with steep, rugged slopes. The terrain is color-coded by elevation, with greens and yellows representing lower elevations and browns and greys representing higher elevations. A prominent airport runway is visible on the eastern side of the island. The surrounding sea is a deep blue, and some white clouds are visible at the top of the frame.
